ACHIEVEMENTS

Technoholix (Trending Technologies)
Stood first in 3round technoholix organised by club Illuminati. Made navigation stick for blinds.

University Honor role
Was awarded with the best academic performer certificate

CERTIFICATES

CS50 (Harvard Univeristy) EdX (05/2017 – Present)

Angular 2.0 (Pluralsight)

INTERESTS

Driving   Cricket   Competitive Programming

SKILLS

HardWorking   Soft Skills   Responsible   Enthusiast

TECHNICAL SKILLS

Programming
C++, JavaScript, Python

Web Development
HTML5, CSS3, Bootstrap3, Flexbox, NodeJS, Angular2+,Express, Django

Databases
MongoDB

Competitive Coding
Data Structures, Algorithms, STL (C++)

PERSONAL PROJECTS

BRAINEES (06/2018 – 07/2018)
- brainees.herokuapp.com
- A mentor-student portal, where , mentors can set quiz and posts, and subscribed students can see and attend quizzes and can respond to their feeds! Learnt a lot, developing the project.
- The frontend design is the result of HTML5, CSS3, Bootstrap, jQuery, Angular2+.
- The backend is implemented using Node.JS and Express framework. Also, it is backed by a Non-Relational database, Mongo DB. The project also uses ODM (Object Document Mapper) named Mongoose for producing schemas.

DigiGuide (03/2018 – 04/2018)
- This project is a part of Rajasthan Hackathon 4.0, which aims at making local guides more visible to foreigners, hotels and online package providing portal. This is an ongoing project and is a prototype. This product brings all those local guides together on an online platform, to address the factor named visibility, the benefit of which is currently taken by private guides hired by private firms.
- Implementation is done keeping importance of data-exchange in mind. The whole of the product is designed using REST framework which makes data-exchange much easier. This would also help others those can innovate with the idea of this product.
